

Iconex™ Pharmacy Labels

Simplify and speed dispensing pharmacy orders

Iconex pharmacy label solutions consolidate information, enable single step variable printing, and seamlessly integrate and streamline existing order processing.

Thermal label rolls drive in-store order fill efficiency and mail order refill services

- Flexibility and function with small footprint, print-on-demand thermal print technology
- Effective at streamlining order workflow by eliminating central printing with counter friendly thermal transaction points
- Custom preprinting available to highlight critical information
- Compatible with auto-apply equipment

Dual web laser forms reduce documents and errors for optimal order fill

- Ideal for order staging and processing automatic refills
- Designed for all-in-one function, the forms integrated prescription, dosing instructions, warnings, and standardized pharmacy literature.
- Save time, paper, and eliminate errors with fewer documents

Iconex rE-label pharmacy offers sustainable restocking and reuse

- Ideal for prefilled abandoned prescriptions
- Allows for easy removal of HIPAA information without full label removal to allow shelf restock and reuse of common dispensed prescriptions
