Iconex™ Shipping Labels

Transform your operations and the customer experience

Iconex offers innovative shipping solutions that transport key information to each actor of your supply chain, ensuring that packages move from the warehouse to the customer's doorstep, efficiently and effortlessly.

Stock and custom products are available in a wide variety of direct thermal and thermal transfer solutions designed to improve readability and deliver the highest scanning success.

Iconex Technology Advantage:

- NIR papers – readability at 675nm
- UV watermarking
- Hidden or masked barcoding
- Custom or sequential preprinted barcodes
- Specialty varnishes for improved toner adhesion

Iconex 2ST™ Shipping Label Solutions

Utilizing both the front and back sides of a thermal label, multiple documents can be printed onto a single label — eliminating mismatched documents, while saving time and money. With variable printing, the possibilities are endless. You can combine shipping information with a packing slip or invoice, add coupons with personalized messages or provide a preprinted return label.

Iconex Traditional Shipping Labels

Iconex stock direct thermal and thermal transfer labels are available in roll and fanfold formats, with and without perforations. We also offer custom solutions specific to the environment and application. Ask your Iconex sales representative for more information.

Iconex Shipping Forms

Iconex dual web and integrated forms marry multiple forms into one, to support single step print, pack, and ship operations. By organizing all information into one form, you can save time, reduce waste and eliminate process downtime and delays.

Iconex Onsite Application Evaluation — Leverage our in-depth industry knowledge and technical expertise to develop an innovative solution for your business. Ask your Iconex sales representative for more information or to schedule your evaluation.
