Iconex® Hazardous Chemical Labeling

Safely control chemical handling, storage, and disposal

OSHA compliant GHS labels for hazardous chemicals are required by law to identify health, physical and environmental hazards and guide proper safety protocols to be taken.

Chemical hazards are any substance that can cause adverse physical and health effects to people or result in harm to the environment due to its chemical properties. Workplaces—especially manufacturing or other related industries—can't totally eliminate or avoid the use of all hazardous chemicals. What businesses can do to protect their workers, however, is to follow and observe safety measures that aim to control the chemical hazards in workplaces and reduce their potential negative impact on employees.

SAFETY AND ENVIRONMENTAL FOCUSED

Proper identification with all GHS required information

- Product identifier, supplier identification, precautionary statements
- Hazard pictograms, a signal word, hazard statements
- Supplemental information

CUSTOMIZED LABEL SOLUTIONS

- Permanent, BS5609 compliant solutions
- “Cradle to Grave” performance
- Up to 6 color process printing
- Paper, vinyl, film, or polyester materials
- Printer friendly laser or thermal transfer options
- Print on demand and pre-printed writable formats

Iconex is the world's leading provider of innovative label solutions that create value for our customers by improving operational efficiency. Our highly differentiated label solutions target specific markets and solve business process problems by utilizing our extensive R&D resources, patent portfolio, and best-in-class manufacturing. Building upon our unique tradition of innovation, we anticipate trends, develop timely solutions, and help solve business challenges. This information is subject to change without notice.
